

Time Matters Report Designer

Create a custom report in Time Matters

Introduction to Time Matters Report Designer

Time Matters has a full-featured Report Designer. You select the records, fields, layout, sorting and totals that you need. This guide illustrates how to create your own custom reports. Here is a sample illustration:

Example Report: Document Counts by Matter

This example shows how to create a custom report that counts the number of Document records per Matter.

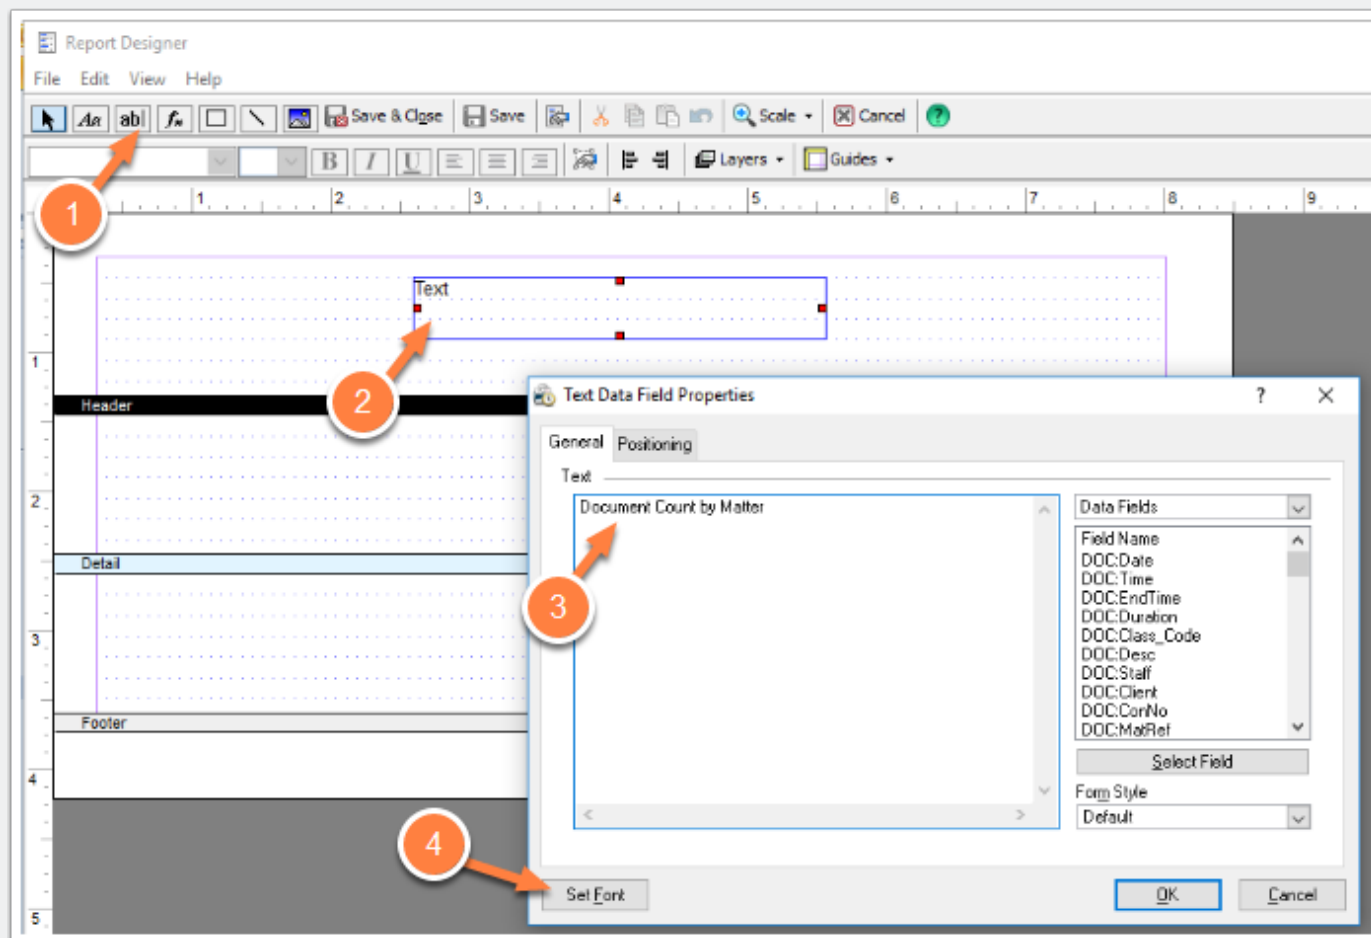

The last steps show how to save the results to Excel where you can identify the Matters with the highest numbers of documents.

Start by: (1) Tagging all the Document records; (2) Click the Reports button; (3) Add a report.

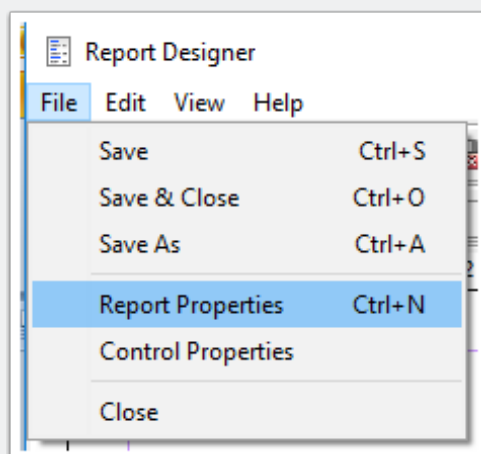

Time Matters Report Designer

Give the Report a Title

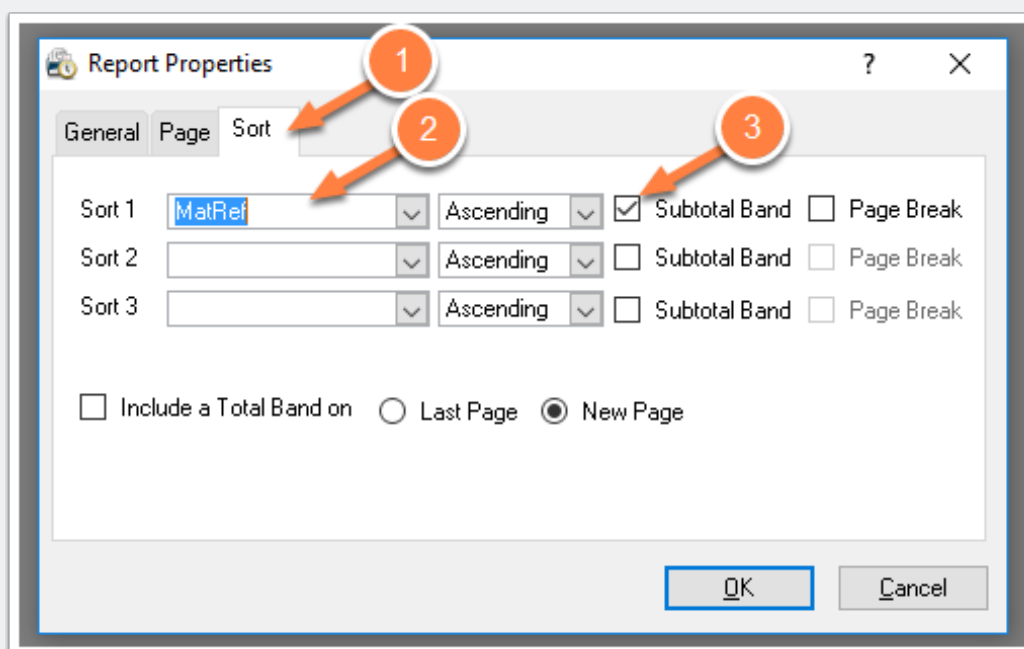

Time Matters Report Designer

Click Report Properties

Sort by Matter Name

Time Matters Report Designer

Design the Report

Report Designer

File Edit View Help

Save & Close Save Scale Cancel

Layers Guides

Document Count by Matter

1 Click and drag Detail bar up, flush with SubHead1. This suppresses showing all individual Documents.

2 Double-click

3 Drag the MatRef field and drop it above the Sub1 pink band.

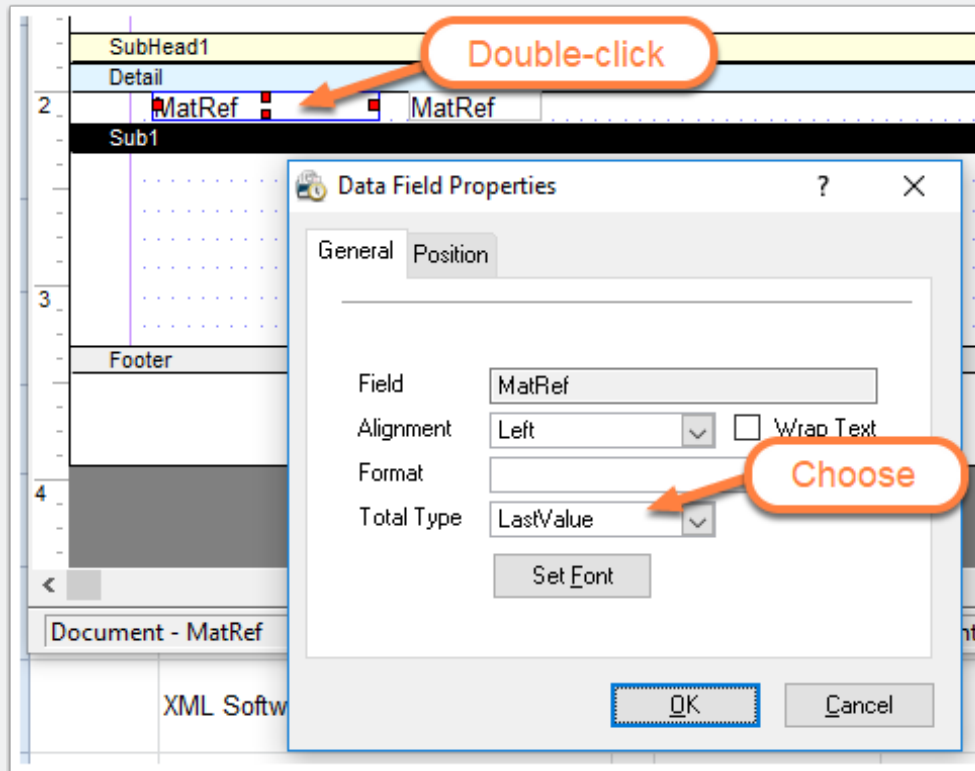

4 Drag the MatRef field again and drop it above the Sub1 pink band.

Data Fields

- Date
- Time
- EndTime
- Duration
- Client
- MatNo
- MatRef**
- MatNo
- FileName
- AutoName
- Reminders
- Follow
- Done
- Notify
- Hide
- Trigger
- Review
- Billable
- Private
- Status

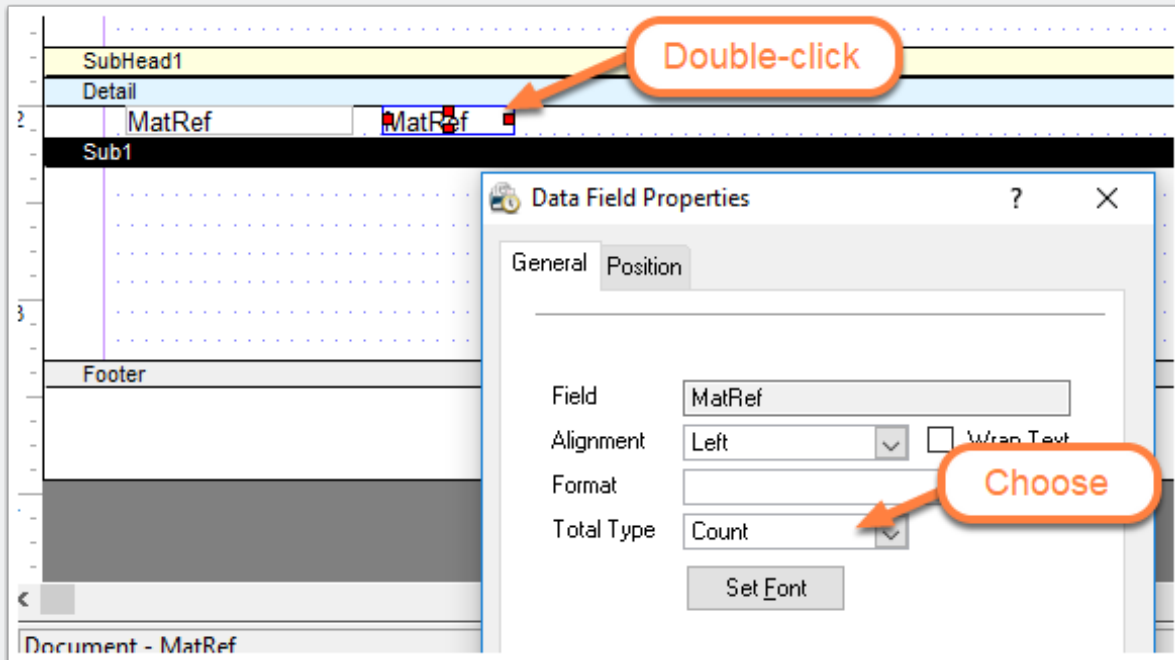

Time Matters Report Designer

Set the Display of Matter Names from the Document Records

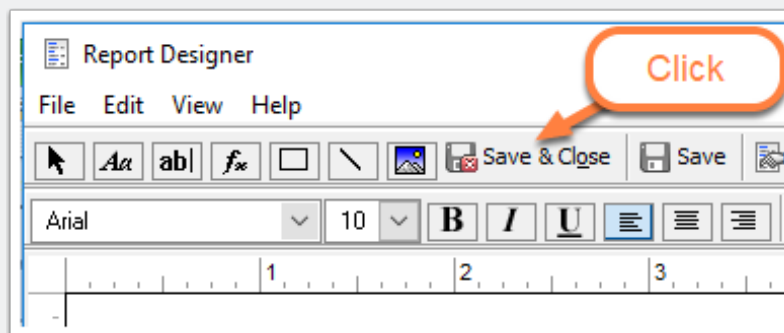

Time Matters Report Designer

Set the Display of Document Counts

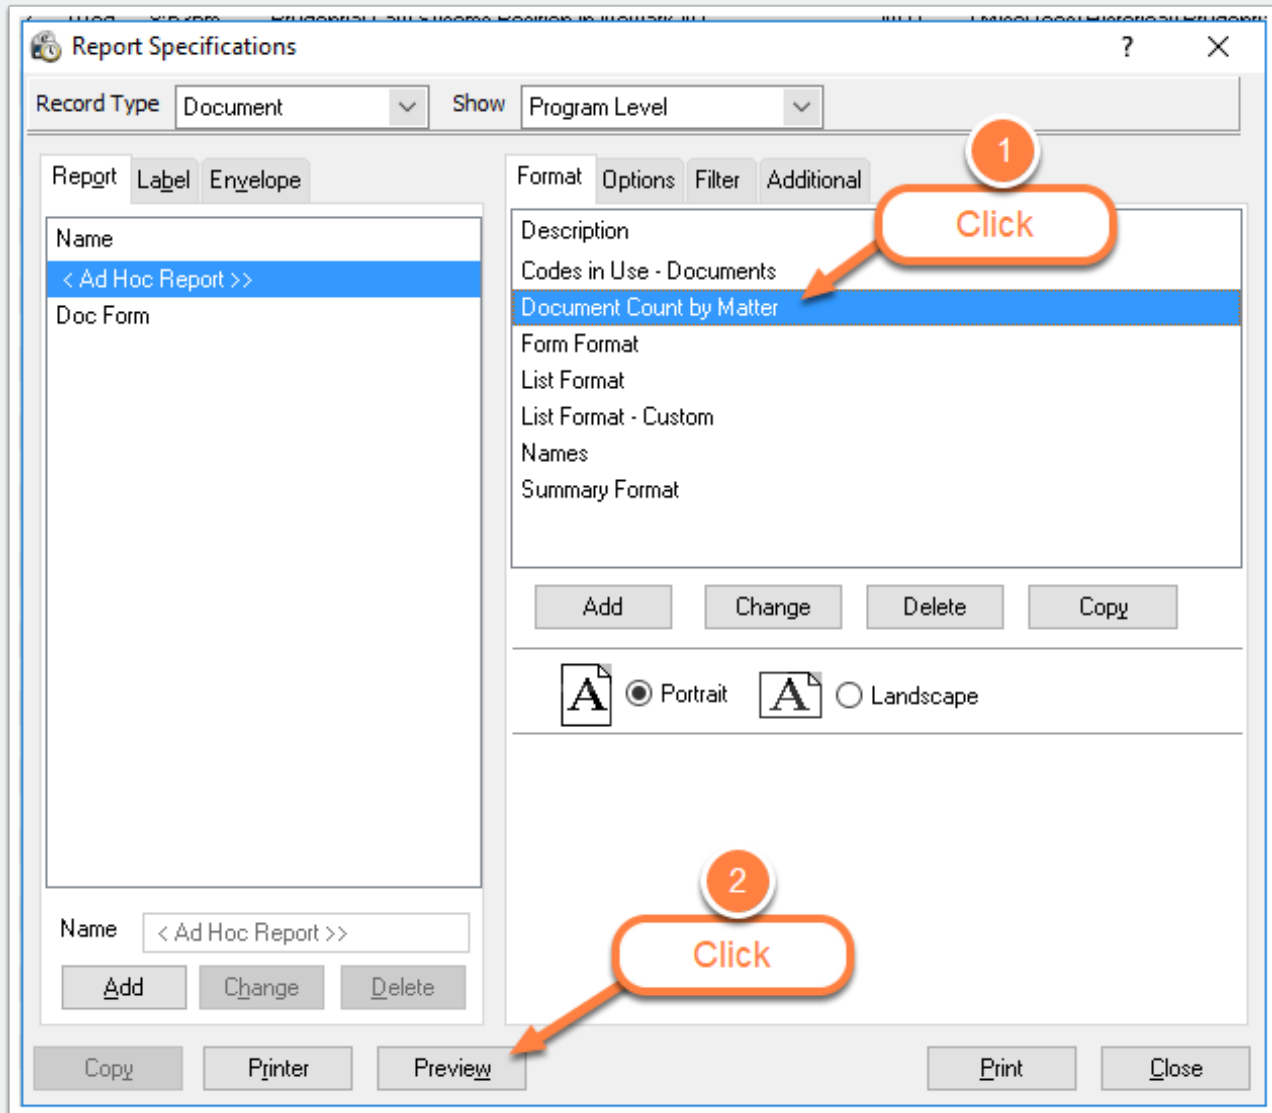

Save and Close the Custom Report

Time Matters Report Designer

Select and Run the Report

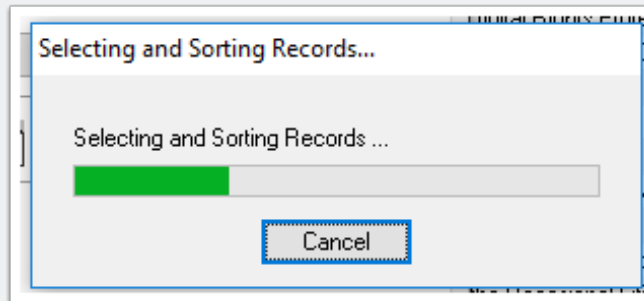

All the Document records should still be tagged from the first step.

Time Matters Report Designer

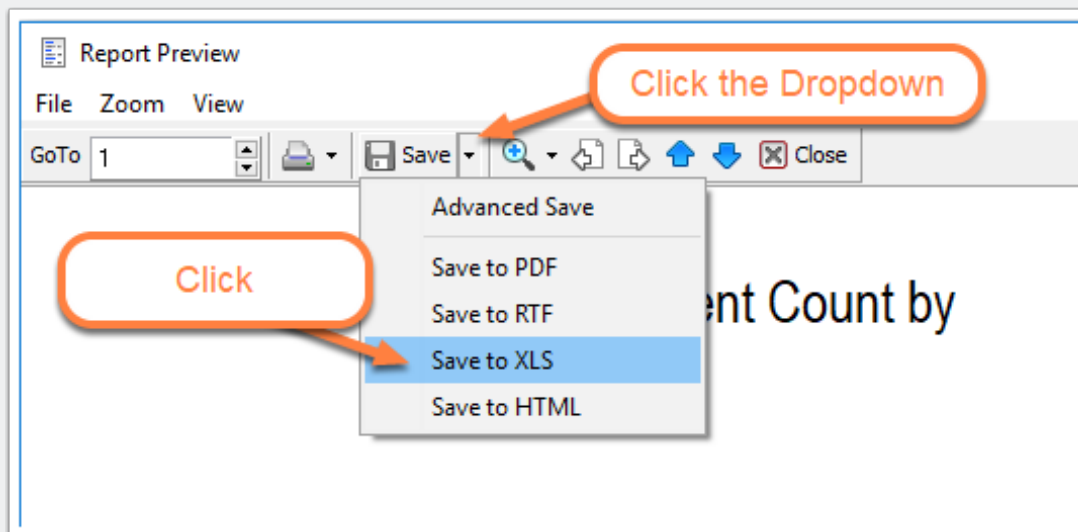

Wait...

It may take several minutes or even 10+ minutes to sort.

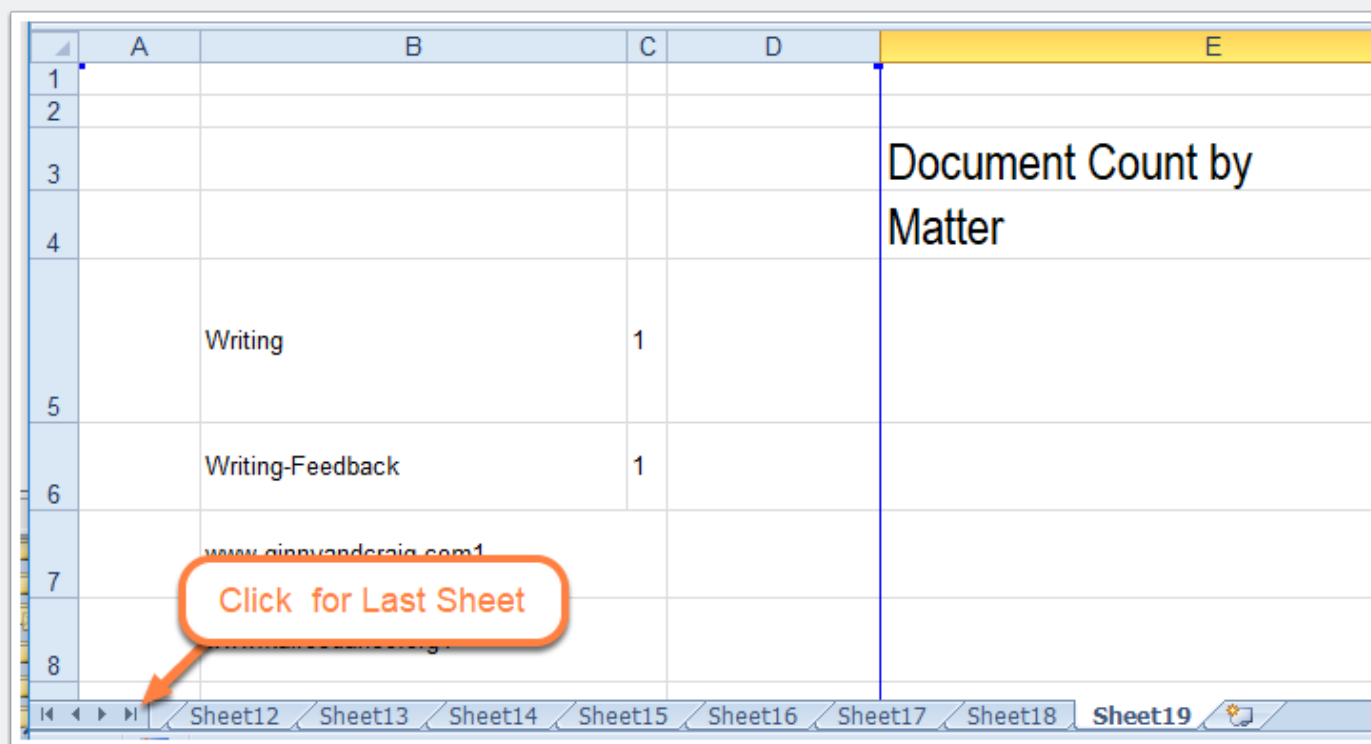

Save to a Spreadsheet

Time Matters cannot sort by subtotals, so create a spreadsheet.

Time Matters Report Designer

Go to the Last of Many Sheets

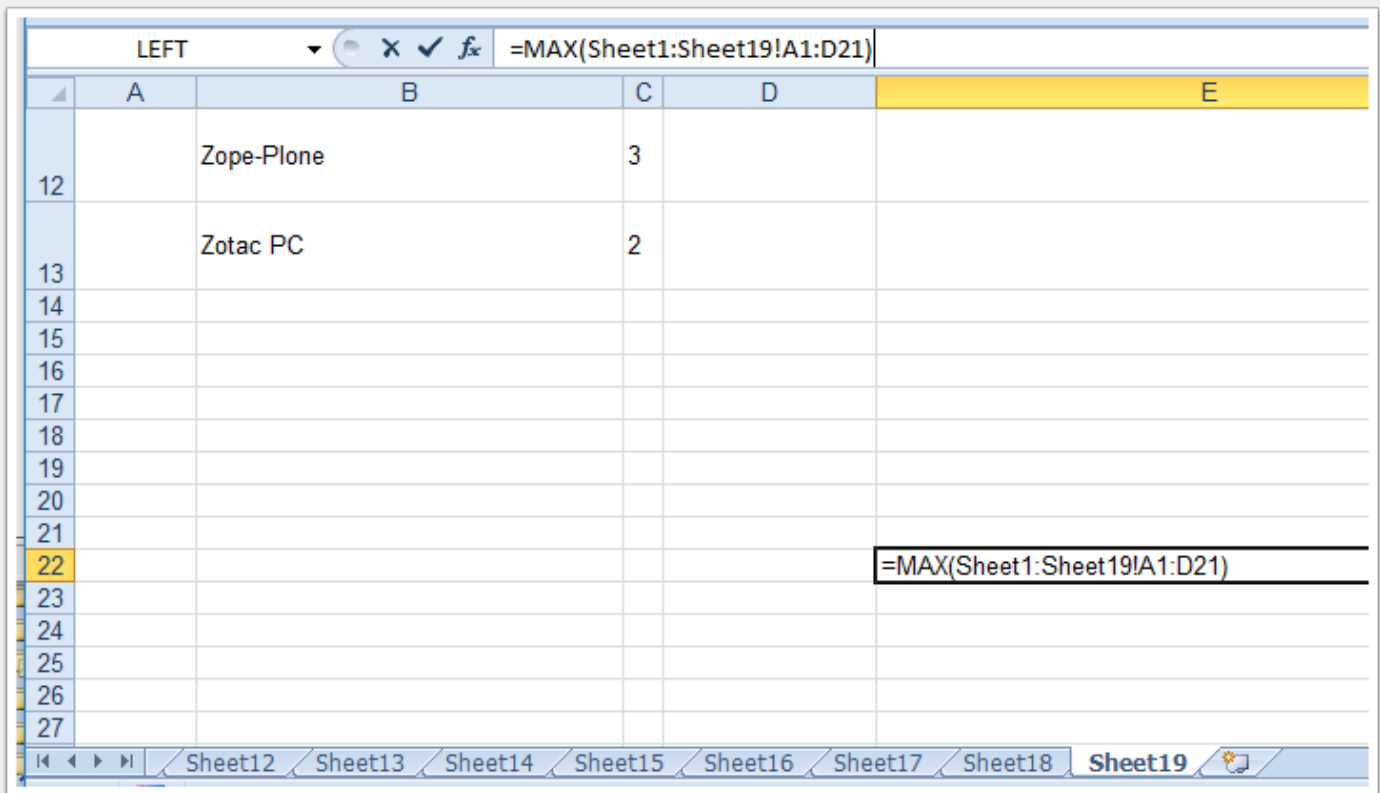

Time Matters Report Designer

Enter the MAX Formula on the Last Sheet

In cell E22, enter: =MAX(Sheet1:Sheet19!A1:D21) where Sheet19 is the name of the last Sheet.

Yours will probably be Sheet1000 or more.

	A	B	C	D	E
12		Zope-Plone	3		
13		Zotac PC	2		
14					
15					
16					
17					
18					
19					
20					
21					
22					=MAX(Sheet1:Sheet19!A1:D21)
23					
24					
25					
26					
27

Find the Matter with the MAX Count in the Excel Workbook

The screenshot shows the Excel 'Find and Replace' dialog box over a worksheet. The formula bar at the top displays `=MAX(Sheet1:Sheet19!`. The dialog box has the following settings:

- Find what:** 27
- Within:** Workbook (selected from a dropdown)
- Search:** By Rows (selected from a dropdown)
- Look in:** Formulas (selected from a dropdown)
- Options:** Match case and Match entire cell contents are unchecked.
- Buttons:** Find All, Find Next (highlighted with a blue border), and Close.

Three orange callout boxes provide instructions:

- Choose: Workbook** points to the 'Within' dropdown.
- Enter the MAX number** points to the 'Find what' text box.
- From your formula** points to the 'Find Next' button.

The worksheet background shows a grid with the number '2' in cell B2. The bottom status bar shows the active sheet is 'Sheet19'.

Excel Highlights the First MAX Number

The screenshot shows an Excel spreadsheet with a table of matter names and counts. The 'Find and Replace' dialog box is open, and the 'Find Next' button is highlighted. A callout box explains the function of the 'Find Next' button.

Matter Name	Count
TM Outlook Sync	1
TM-Backup	1
TM-Billing	1
TM-CIC	27
TM-CIC Training	23
TM-DocAssembly	1

Find and Replace dialog box settings:

- Find what: 27
- Within: Workbook
- Search: By Rows
- Look in: Formulas
- Buttons: Find All, Find Next, Close

Callout: Click to find the next Matter. Decrease the count number to find next highest
